

QSFP Loopback Module

The QSFP Loopback Module effectively tests QSFP ports in the host system by looping back the electrical signal. The loopback supports data rates of up to 100 Gbps. Applications include Fibre Channel, InfiniBand, Gigabit Ethernet and so on. The hot pluggable feature allows changing to/from another QSFP compatible module without having to remove system power. Each module provides serial ID information which describes the part number in the EEPROM.

Product Features & Benefits

- Broadband operation capabilities for data rate up to 100 Gbps
- Extended plug cycle life
- Excellent EMC/EMI performance
- Only “positive latching” in the industry (patent pending) lowers the risk of field failure
- Customized loopback module solutions including EEPROM contents
- Proprietary high-speed PCB design minimizes the impedance discontinuity and crosstalk
- Different pull-tab color options
- QSFP MSA Compliant
